

ARE YOU SATISFIED WITH YOUR IOT SOLUTION?

You already have an IoT solution - but it's not delivering as expected? Or isn't able to scale? Or you are just facing a vendor lock-in? In that case, it's time for a cross-check. Look at your IoT solution through the eyes of leading IoT architecture experts - with our [5-by-5 IoT Solution Review](#).

We developed a [systematic & holistic assessment](#) pattern that allows us to evaluate your IoT solution at every stage of your digitalization strategy. Our 5-by-5 IoT Solution Review considers all architecture and technology-related criteria incl. operations & costs when it comes to [matching your business goals with effective implementation and unleveraged potential](#).

"Thanks to Device Insight, we were able to design our Connected Car solution to our exact specifications and fully deploy the MIND smartbox in just 12 months."

Peter Verhoeven, ICT architect, MIND

THE 5 KEY DIMENSIONS FOR OUR ARCHITECTURE ASSESSMENTS

1. Technologies, strategy & industry standards:

Every modern IoT architecture is evolving permanently. Is your solution state-of-the-art? Do you benefit from industry standards, e.g. interfaces?

2. Scalability & performance: Are you able to grow your solution to keep up with future peak loads of 10,000 or even 100,000 devices as your business grows?

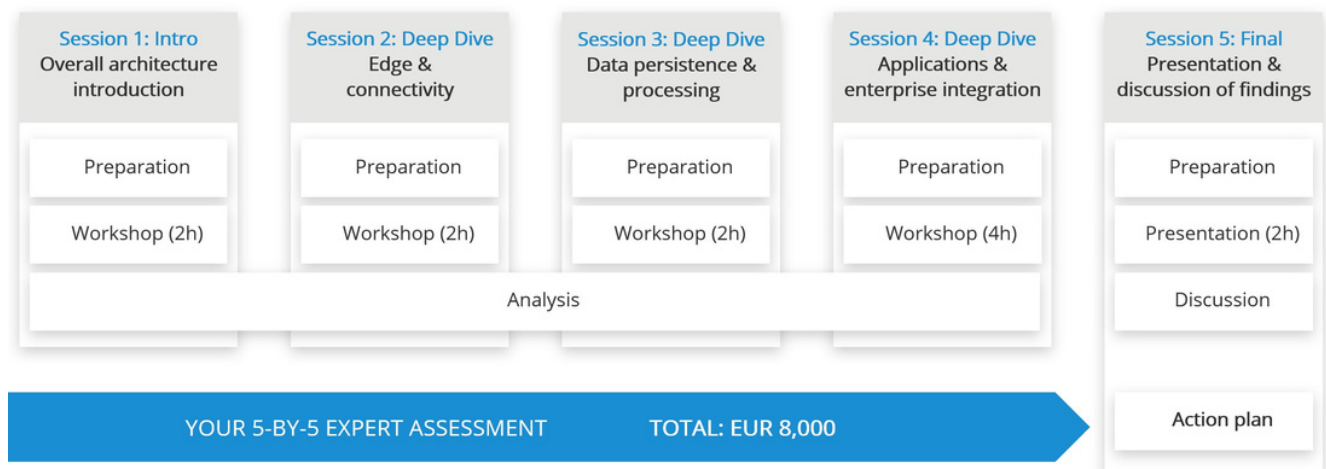

3. Cost considerations: Have you optimized your architecture for your business case? The hyperscaler cloud price models are highly transactional. Architecture

decisions and technology choices can have huge impacts on your monthly usage bill.

4. IoT security: Have you adopted the security best-practices for cloud applications? How do you manage a secure connectivity to your IoT devices?

5. Maintenance & operations: Is your solution ready for smooth and efficient operations in the cloud? Do you have a consistent monitoring concept and cover high-availability scenarios? How do you manage releases and a continuous delivery?

IN 5 SESSIONS WE WILL REVIEW & EVALUATE YOUR IOT SOLUTION, MINDFUL OF THE 5 KEY DIMENSIONS, AND RECOMMEND ACTIONS

YOUR BENEFITS AT A GLANCE

- Assessment of current system
- Gap analysis & best practices
- Findings & action plan
